

## **REACH Compliance Statement**

Polyacrylamide as sold by Metrohm AG (Switzerland) is exempt from registration under REACH.

Polyacrylamide is a polymer and is as such not covered by REACH. The monomers therein, acrylamide and N,N-methyldiacrylamide, are not subject to registration because the annual quantities exported by Metrohm AG to the countries of the European Union are below the relevant threshold of 1 tonne per annum.

The starter chemical, ammonium peroxodisulfate, is not present in the polymer matrix at relevant quantities.
