

TacticID-GP Plus Raman-Handspektrometer

BWT-840000972

Das TacticID-GP Plus ist ein Raman-Handspektrometer für den Feldeinsatz, das der schnellen und zerstörungsfreien chemischen Identifikation dient. Ansprechzeit und operative Unsicherheit können so verkürzt werden. Dank intuitivem Workflow und Touchscreen können Proben durch undurchsichtige und transparente Verpackungen zerstörungsfrei analysiert werden. Den Benutzern, z. B. Sicherheitspersonal, Einsatzkräften (etwa von Strafverfolgungsbehörden), Zoll und Grenzschutz sowie Bombenräumkommandos und Teams zur Gefahrstoffbeseitigung, wird der Gefährdungsgrad klar und deutlich angezeigt, sodass sie selbst bei minimalem Kontakt mit der Probe schnell reagieren können. Das TacticID-GP Plus greift auf die bewährte Raman-Spektroskopie zurück und ermöglicht Benutzern Echtzeit-Identifikation von Proben mit übersichtlicher Anzeige des Gefährdungsgrads sowie der Sicherheitshinweise nach GHS und NFPA704.
