

Combined Ag-ring electrode with AgBr coating

6.00450.100BR

Combined silver ring electrode with fixed ground-joint diaphragm.

The permanently fused-in silver ring is resistant to more highly concentrated acids and saline solutions and is coated with bromide (AgBr) for increased sensitivity and a better limit of detection.

This electrode is suitable for precipitation titrations when the pH value varies (titrant silver nitrate) of, e.g.:

- chloride, bromide, iodide
- sulfides
- hydrogen sulfide
- mercaptans
- cyanides

The fixed ground-joint diaphragm is insensitive to contamination.

$c(\text{KNO}_3) = 1 \text{ mol/L}$ is used as reference electrolyte and storage solution.
