

Metrosep C Supp 1 - 100/4.0

6.1052.410

The short version of the Metrosep C Supp 1 is used for the rapid determination of cations in the $\mu\text{g/L}$ range with conductivity detection following sequential suppression. The baseline noise in cation analysis is improved by the suppression. This results in lower detection limits for the cations to be determined.

Below, the accessories are grouped into Scope of delivery and Optional accessories. Please keep this printout at hand for ordering replacement material. These lists may be subject to change.

Optional accessories

Order no.	Description
-----------	-------------

The Metrosep C Supp 1 Guard/4.0 contains the C-Supp-1 column material and is used to protect Metrosep C-Supp-1 cation columns. Particles and contamination are reliably retained, considerably prolonging the service life of the analytical separation column. The Metrosep C Supp 1 Guard/4.0 also works based on the "On Column Guard System" and is screwed directly onto the separation column with virtually no dead volume.
