

Espectrómetro manual Raman TacticID-GP Plus

BWT-840000972

El TacticID-GP Plus es un espectrómetro manual Raman para el uso sobre el terreno que proporciona una identificación química rápida y no destructiva. De este modo pueden reducirse el tiempo de respuesta y la incertidumbre operativa. Gracias a un flujo de trabajo intuitivo y a una pantalla táctil, las muestras pueden analizarse de forma no destructiva a través de embalajes opacos y transparentes. Los usuarios como, por ejemplo, personal de seguridad o fuerzas de seguridad (las autoridades policiales, entre otras), los guardias de aduanas y de fronteras, las unidades de desactivación de bombas y los equipos de eliminación de materiales peligrosos, pueden evaluar el nivel de peligro de forma clara y rápida, lo que les permite responder rápidamente, incluso con un contacto mínimo con la muestra. El TacticID-GP Plus utiliza la contrastada espectroscopía Raman para permitir a los usuarios identificar muestras en tiempo real, con una visión clara de los niveles de peligro y las indicaciones de seguridad conforme al sistema GHS y la norma NFPA 704.
