

StabNet 2.x full

6.6068.202

Programma per PC per il controllo e la gestione dei dati degli strumenti di misura della stabilità. Il software consente l'acquisizione, la valutazione e il monitoraggio dei dati, nonché la creazione di relazioni sulle misure della stabilità.

Interfaccia utente grafica per operazioni di routine, programmi banche dati estesi, creazione di metodi, configurazione del sistema; amministrazione utenti molto flessibile, ampie funzioni di esportazione dei dati, generatore di relazioni configurabile individualmente.

StabNet Full soddisfa le direttive secondo FDA 21 CFR Part 11.

Lingue delle finestre di dialogo: tedesco, inglese

Sono supportati i seguenti strumenti:

- 892 Professional Rancimat
- 893 Professional Biodiesel Rancimat
- 895 Professional PVC Thermomat

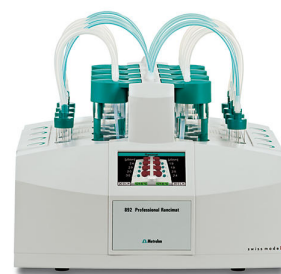

1 licenza per un massimo di 4 strumenti di misura della stabilità su un PC.

Accessori opzionali

Order no.	Descrizione
2.892.0010	892 Professional Rancimat

The 892 Professional Rancimat is an analysis system for the simple and safe determination of the oxidation stability of natural fats and oils with the well-established Rancimat method. With eight measuring positions in two heating blocks. The built-in display shows the status of the instrument and each individual measuring position. Start buttons for every measuring position enable the measurement start on the instrument. Cleaning effort can be reduced to a minimum through the use of practical disposable reaction vessels and dishwasher-safe accessories. This saves time and costs and significantly improves accuracy and reproducibility.

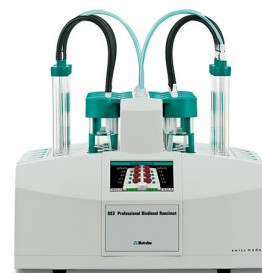

All accessories necessary for carrying out determinations are included in the scope of delivery. The StabNet software is required for instrument control, data recording and evaluation and for data storage.

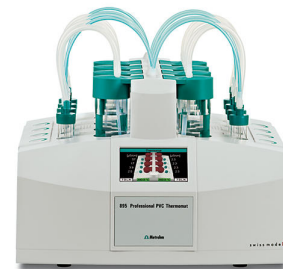

2.893.0010	893 Professional Biodiesel Rancimat
------------	-------------------------------------

The 893 Professional Biodiesel Rancimat is an analysis system for easy and safe determination of the oxidation stability of biodiesel (fatty acid methyl ester, FAME) and biodiesel blends in accordance with EN 14112, EN 15751 and EN 16568 standards. With eight measuring positions in two heating blocks. The built-in display shows the status of the instrument and each individual measuring position. Start buttons for every measuring position enable the measurement start on the instrument. Cleaning effort can be reduced to a minimum through the use of practical disposable reaction vessels and dishwasher-safe accessories. This saves time and costs and significantly improves accuracy and reproducibility.

All accessories necessary for carrying out determinations are included in the scope of delivery. The StabNet software is required for instrument control, data recording and evaluation and for data storage.

The 895 Professional PVC Thermomat is an analysis system for the automatic determination of the thermostability of polyvinyl chloride (PVC) and related copolymers. With eight measuring positions in two heating blocks. The built-in display shows the status of the instrument and each individual measuring position. Start buttons for every measuring position enable the measurement start on the instrument. Cleaning effort can be reduced to a minimum through the use of practical disposable reaction vessels and dishwasher-safe accessories. This saves time and costs and significantly improves accuracy and reproducibility.

All accessories necessary for carrying out determinations are included in the scope of delivery. The StabNet software is required for instrument control, data recording and evaluation and for data storage.

Upgrade of StabNet 1.0 or 1.1 (Full) to Stabnet 2.X Full.
