

Vision Air 2.0 Network Complete

6.6072.207

Vision Air - Universal spectroscopy software.

Vision Air Network is a modern and simple-to-operate software solution. The network version enables the structuring of a global server-client network with a central database.

Overview of the advantages of Vision Air:

- Individual software applications with adapted user interfaces ensure intuitive and simple operation
- Centralized data and instrument management
- Simple configuration and updating of several devices in just a few steps

The Vision Air Network Complete version (66072207) contains all applications for quality assurance using Vis-NIR spectroscopy:

- Application for a global instrument and data management
- Application for method development

- Application for routine analysis

Phụ kiện tùy chọn

Order no.	Description
6.6072.204	<p>Vision Air 2.0 Server</p> <p>The Vision Air Server version is required for one-time use for structuring a server-client network with Vision Air Network (order number: 6.6072.206).</p> 
6.6072.206	<p>Vision Air 2.0 Network</p> <p>Vision Air - Universal spectroscopy software</p> <p>Vision Air Network is a modern and simple-to-operate software solution. The network version enables the structuring of a global server-client network with a central database.</p> <p>Overview of the advantages of Vision Air:</p> <ul style="list-style-type: none"> • Individual software applications with adapted user interfaces ensure intuitive and simple operation • Centralized data and instrument management • Simple configuration and updating of several devices in just a few steps <p>The Vision Air Network version (66072206) contains the following applications:</p> <ul style="list-style-type: none"> • Application for instrument and data management • Application for routine analysis <p>Select this version when you already have a software for method development (Vision, PLS_Toolbox or Unscrambler®).</p> 

6.6072.300

Pre-calibration for the lumber industry

Pre-calibration for the determination of the kappa number and density as well as breaking, tensile and buckling strength in wood pulp by means of NIR spectroscopy.

6.6072.301

Pre-calibration for the analysis of polyols

Pre-calibration for determination of the hydroxyl number in polyols by means of NIR spectroscopy.

6.6072.302

Pre-calibration for crude palm oil analysis

Determination of iodine number, moisture, and free fatty acids in crude palm oil.

6.6072.303

Pre-calibration for crude palm kernel oil analysis

Determination of iodine number, moisture, and free fatty acids in crude palm kernel oil.

6.6072.304 Pre-calibration for RBD palm oil analysis

Determination of iodine number, moisture, and free fatty acids in RBD palm oil

6.6072.305 Pre-calibration for diesel analysis

Determination of cetane index und cetane number, as well as density, cold filter plugging point, flash point and sulfur in diesel fuel.

6.6072.306 Pre-calibration for gasoline analysis

Determination of octane number, LCI, benzene, aromatic compounds, olefins, oxygen and density in gasoline.

6.6072.307 Pre-calibration for kerosine analysis

Determination of cetane index, aromatic compounds, density, flash point, hydrogen, viscosity and other parameters in kerosine.

Pre-calibration for determination of the NCO number in isocyanate using NIR spectroscopy.
